## Technical Experience

### On Tap Colorado

The premium source for up-to-date information on your favorite Colorado breweries. Allows for real-time tap rotations and push notifications directly to their followers. No more dependency on Facebook & Instagram to communicate with patrons.

### Avalanche

A web-based app developed to challenge the user with escaping the Rocky Mountains in an 80's 8-bit-themed game. Inspired by *The Oregon Trail*, the player must choose four items wisely to overcome random obstacles before the darkness takes them!

### Gotchu

A startup addressing the clean water crisis occurring in Flint, Michigan. Developed to provide a blockchain based localized giving platform, users can donate through a secure system to help those who need water to cook, clean, bathe, and drink.

### Audio Sauce

An audio-weather synchronization application that pulls the user's current location and provides a curtailed playlist, using the Spotify API, dependent on the weather in your area. Streamlined and minimal user-interface for a simple yet unique experience.
